

EDIPlus Ltd have an opportunity for a Devops/Software Deployment Engineer

Your day to day duties will include working closely with our development, customer, IS and support teams and some of our clients to implement new and maintain existing solutions, and optimise our innovative solutions.

About us

- We're a dedicated and passionate team who work hard to ensure we give our clients solutions to their problems.
- We're open to improving the ways in which we provide solutions.
- We embrace change and want to work with the best tools, processes and people.
- Your personal development is encouraged.
- What you do matters – you will see the impact of your contribution.

What we are looking for

- People who are solution focused with a practical approach to problem solving.
- Understanding and/or experience of programming, server admin, operations in a commercial environment.
- Knowledge and practical experience of web applications.
- Experience working with cloud environments.
- A hands-on approach.
- A passion for solving problems quickly and safely, and identifying strategies to stop them recurring.

Essential skills and experience

- Understanding of Windows user security model
- In depth experience with windows software
- Comfortable with technical details such as IP addresses, virtual machines, config files, SMTP and tools such as RDP
- Comfortable working with external partners on matters such as hosting and Server and Network Administration
- Comfortable working with internal partners on matters such as software development and deployment

Potentially useful skills and experience

- Windows server administration
- Windows AD experience
- Understanding of the role of firewalls
